

"CAP-Related DSM5 Diagnoses: DMDD, Gender Dysphoria, and ASD"

*Sponsored by the ECP Committee
co-chaired by Scott Shaffer, MD and Oliver Stroeh, MD*

**Tuesday, February 9, 2016
6:30 – 8:30 p.m.**

*Location: Mount Sinai St. Luke's Hospital,
Muhlenberg Auditorium, 440 West 114th Street,
4th Floor, New York, NY*

Please join us for a panel discussion of three new and/or "improved" DSM5 diagnoses pertinent to child and adolescent psychiatry. The case-based discussion will be led by three expert child and adolescent psychiatrists who will review rationale behind these three diagnostic entities and the potential significance of these diagnoses as they pertain to the practice of child and adolescent mental health. Mental health providers of all disciplines are welcome. *Dinner will be served.*

Gabrielle Carlson, MD

*Topic: Disruptive Mood Dysregulation
Disorder (DMDD)*

Richard Pleak, MD

Topic: Gender Dysphoria

**Jeremy Veenstra-
Vanderweele, MD**

Topic: Autism Spectrum Disorder (ASD)
